In the sleepy town of Harrogate, a series of seemingly unrelated events sends shockwaves through the community. First, a local baker is found dead in his own kitchen, his body pierced by numerous compass needles. Days later, a respected architect meets an untimely end when a massive protractor falls on his head from a nearby construction site. As the body count rises, Detective Inspector McLoud senses a sinister pattern emerging.

Enter Professor Stewart, the enigmatic math teacher with an uncanny ability to solve puzzles. Teaming up with Detective McLoud, Stewart unravels a series of mathematical clues that connect the victims to each other and point to a shadowy organization known as "The Seven Deadly Sins." This secretive group is determined to use mathematics as a weapon for revenge, targeting individuals who have wronged them in the past.
